

Optimized Data Management with Proactive Data Volume Reduction Analysis

Powered by Solution Manager as a Managed Service

Over the years, every SAP system begins to accumulate a large amount of data, and we all know that data is the life blood of any business. However, the staggering growth of data in today's complex system environments makes it imperative to develop a strong data management strategy to control costs and reduce risk.

The pain points associated with lack of sufficient archiving are self-evident: uncontrolled database growth, slow-running reports and backups, long runtimes for audits and period-end closing, along with unpredictable runtimes for transformation services like support packs and upgrades. If you don't have the time or space to create a sandbox to apply support packs, what happens? You wait, and the next thing you know, years have gone by and you are far behind.

The right partner can provide your business with insight into the current data environment, along with options for archiving and purging of data for more efficient operations.

HOW IT WORKS & BENEFITS

itelligence Proactive Data Reduction Analysis provides your business with ongoing analysis and recommendations to reduce and maintain the size of your SAP database. An honest and detailed evaluation of your situation and a regular assessment on a quarterly basis will provide your business with many benefits:

- Reduction of complexity and cost
- Increased compliance
- Data quality and content management
- Ability to control data growth and properly plan your infrastructure
- Recommendations for improved data processing times and performance
- Access to Solution Manager as a Service
- Savings on investments in hardware

Solution Manager as a Managed Service

Solution Manager as a Managed Service (SMaaS) allows you to realize the full benefits of Solution Manager without having to worry about maintaining hardware, configuring the system, and having the internal knowledge to keep the system up to date.

- 1 No infrastructure, license, or upgrade costs
- 2 Predictable and affordable pricing
- 3 Complete set-up and configuration in two weeks
