

GIB Suite Operations (GSO)

## Handling Everyday MRP Activities – Save Time. Get the Big Picture.

Material management often lacks a central interface for a planner to quickly assess and prioritize the material requirements for any given day. They don't have a single launch point to manage their daily tasks or access easily digestible data. Supply chain planning and execution needs to be streamlined, have access to real-time analytics, and have productive planning.

### Solution Overview

**Quick and Early Recognition System:** Identify and control critical materials.

**Efficient Daily Operations:** Single launch point to manage daily tasks.

**Quick and Accurate Communication:** Cross-factory views can be called up easily and quickly.

### Your Benefits

#### Consolidate 20+ SAP Supply Chain

**Transactions/Tiles:** Central planning and execution cockpit gives material management professionals a single centralized point to manage their tasks.

#### Complete Supply Chain Daily Management:

Includes a module for the daily work of every employee working along the supply chain. Because of custom user layouts and predefined standard layouts, all information relevant to the individual's workstream can be easily accessed and displayed.

**Cross-Factory Visibility:** Views on individual material level and structures of bills of materials or parts usage can be called up quickly and easily.

### Features and Functions

GIB Suite Operations (GSO) supports the following:

- Fully embedded within SAP, no additional hardware or interfaces required
- Proactive alert monitor
- Missing parts and where used drill downs
- Streamlined purchase requisition and planned order conversion
- Purchasing and production order information
- Standard reports with drill down to quickly identify and remedy problem materials
- Ad hoc formulas, and individual multi-screen monitor

### Requirements

- Minimum of Release SAP ECC 6.0 EhP 0
- Requires a software maintenance contract, which includes Help Desk support and product updates
