

GIB Suite Production (GSP)

Start Planning Capacities Accurately and Efficiently

Production planning and scheduling is a fluid, dynamic process. Schedules are always being adjusted to meeting changing customer requirements, changing priorities and shifting capacities. Managing schedules and resources in this dynamic environment requires flexible, real-time and easy-to-use tools within your core SAP system.

Solution Overview

Drag and Drop Functionality: Real-time response in simulations prior to production.

Improved Capacity Planning and Sequencing: Tabular planning table to optimize production process.

Quick, Flexible Planning: Adjustments to capacity can be made quickly and easily.

Your Benefits

Error-Free Production: Provides risk-free production planning that results in saved time, resources, and money.

Immediate Triggering Purposes: In cases of bottlenecks, conflict, or overload, immediately trigger the necessary measures across different planning areas.

At-a-Glance Planning: All important information such as missing parts, exceptions, PRT, and conflicts can be viewed in one easy dashboard, along with drag & drop capabilities.

Features and Functions

The GIB Suite Production (GSP) solution provides support for the following:

- Fully embedded within SAP, no additional hardware or interfaces required
- Easy capacity set up and adjustment
- Frozen zone, ad hoc formula, individual multi-screen monitor
- Individual design of work center view
- Integration of MRP information
- Change over and setup time adjustments

Requirements

- Minimum of Release SAP ECC 6.0 EhP 0
- Requires a software maintenance contract, which includes Help Desk support and product updates
