

SAP S/4HANA Upgrade Packages

KEEP YOUR SAP S/4HANA SYSTEM CURRENT WITH A PREDICTABLE UPGRADE PATH AND MINIMIZED RISK

NTT DATA Business Solutions

UPGRADE YOUR SAP S/4HANA SYSTEM TO LEVERAGE THE LATEST INNOVATIONS

Businesses that have adopted SAP S/4HANA® have been able to reap the benefits of functionality like real-time analytics and forecasting to remain agile while driving core business objectives. However, as with any technology, your SAP S/4HANA system needs to be kept current with updates in order to leverage the latest innovations and continue to receive mainstream support.

Why You Need to Keep Your S/4HANA System Current

Staying on mainstream maintenance for SAP S/4HANA means upgrading at least once every five years. That may seem daunting, especially if your organization lacks the technical and/or functional resources or bandwidth needed to complete the tasks. However, neglecting these upgrades can have an impact on your long-term business success over time.

Remaining on your existing release not only prevents your business from leveraging the latest SAP S/4HANA innovations, but also potentially compromises your security posture and software maintenance. That can result in higher costs and, ultimately, falling behind.

Introducing SAP S/4HANA Upgrade Packages

NTT DATA Business Solutions executes numerous SAP S/4HANA upgrades each year and has developed an upgrade factory approach to ensure efficient execution with the highest quality. Our approach leverages the foundation of our conversion and testing factories to deliver the most complete service possible. The S/4HANA Upgrade Packages were created based on an analysis of past upgrades, large and small, and the commonalities across them.

Our upgrade services cover landscape discovery, upgrade planning, and upgrade execution. Depending on your requirements, the scope can include a technical upgrade, functional upgrade, functional testing, as well as enabling new functionalities. Our goal is to provide you with the right solutions to keep you ahead of the curve.

Benefits for Your Business

- Drive more business value by taking advantage of new business functionality, including new products and features
- Stay current with corrections and security patches
- Improve and increase the value delivered by your SAP S/4HANA system
- Continuous maintenance support
- Greater Fiori capabilities
- Frontline innovation

Keeping your system up to date will better equip your business to be successful and take advantage of all that SAP S/4HANA has to offer.

Why NTT DATA Business Solutions?

Digital transformation helps companies reach their full potential - if the underlying technologies work for the people using them. At NTT DATA Business Solutions, we design, implement, manage and continuously enhance SAP solutions to make them work for companies - and for their people.

Aiming to transform, grow and become more successful? We provide you with more than in-depth expertise for SAP solutions: As your passionate partner, we connect your business opportunities with the latest technologies - and offer you a unique approach to get the job done as smoothly as possible.

Our close ties to SAP and other partners give you access to innovative solutions and developments. Being part of the global NTT DATA group enables us to master any scope of project.

With operations in more than 30 countries, we have enabled thousands of companies to become more efficient and effective during the last three decades. Our 10,000 experts around the world will also accompany you on your journey toward a truly intelligent enterprise - wherever you want to start!
